All amounts are stated in Canadian dollars unless otherwise indicated. The reader should also refer to the audited consolidated financial statements for the years ended May 31, 2020 and May 31, 2019 and related notes attached thereto and the related Management Discussion and Analysis for those years.

### **Forward looking statements & cautionary factors that may affect future results**

This MD&A may contain "forward-looking statements" which reflect the Company's current expectations regarding the future results of operations, performance and achievements. The Company has tried, wherever possible, to identify these forward-looking statements by, among other things, using words such as "anticipate," "believe," "estimate," "expect" and similar expressions. The statements reflect the current beliefs of the management of the Company, and are based on currently available information. Accordingly, these statements are subject to known and unknown risks, uncertainties and other factors, which could cause the actual results, performance, or achievements of the Company to differ materially from those expressed in, or implied by, these statements. Historical results of operations and trends that may be inferred from the following discussions and analysis may not necessarily indicate future results from operations. ### **Qualified Person**

Jeffrey Scott Ackert, a director of the Company and former Vice President Exploration and Business Development, is a Qualified Person as defined by National Instrument 43-101 and has reviewed and approved the exploration information and technical disclosure.

### **Tabasquena Property, Mexico**

On July 20, 2017, Advance Mexico, a subsidiary of the Company, entered into an agreement with Hot Spring Mining S.A. de C.V. ("Hot Spring Mining") to acquire the Tabasquena Silver Mine in Zacatecas, Mexico ("Mining Concessions"). The Company issued 1,000,000 common shares to Hot Spring Mining in exchange for 100% interest in the Mining Concessions.

Hot Spring Mining will retain a 2.5% NSR of which the Company has the right to purchase a maximum of 1.5% NSR at \$500,000 per each 0.5% NSR. In addition, two partners of Hot Spring Mining became consultants of the Company since October 2017.

On September 27, 2018, the Company acquired Exchange approval to purchase certain mining equipment assets on the Tabasquena project in exchange for 600,000 common shares with a fair value of \$300,000, to be issued in tranches of 150,000 shares. On October 2, 2018, 150,000 common shares were issued with a fair value of \$21,000, 150,000 common shares were issued on July 19, 2019 with a fair value of \$21,000, and 150,000 common shares were issued on October 30, 2019 with a fair value of \$21,000. The final 150,000 shares were issued on January 2, 2020 and have a fair value of \$21,000.

Work is ongoing on the project. The Company is reviewing results and developing targets for further work.

### **Venaditas Property, Mexico**

On April 9, 2018, Advance Mexico entered into an agreement with Hot Spring Mining to acquire its 100% interest in the mining concession Venaditas in Zacatecas, Mexico. The Company issued 1,000,000 common shares to Hot Spring Mining in exchange for 100% interest in the Mining Concessions.

Hot Spring Mining will retain a 2.5% NSR of which the Company has the right to purchase a maximum of 1.5% NSR at \$500,000 per each 0.5% NSR. In addition, two partners of Hot Spring Mining became consultants of the Company for a minimum period of 16 months at \$2,000 per month each starting in January 2018. The agreement with the consultants were extended on September 1, 2019 for an additional 16 months. Exchange approval for the transaction was obtained in October 2018.

## Results and Discussion of Operations

Advance's focus continues to be the exploration of properties and consequently, no operating income is shown or expected. The Company incurred a loss and comprehensive loss of \$501,676 for the nine months ended February 28, 2021, compared to a net loss of \$196,035 for the nine months ended February 29, 2020. The current period loss is higher due to higher advertising and promotion, management fees, stock based compensation and wages and benefits. Drilling in Phase 2 at the Tabasquena silver and gold project has identified a series of epithermal veins which have been drilled above the boiling zone and remain open at depth and along strike.

### Summary of Quarterly Results

The significant changes in key financial data from March 1, 2019 to February 28, 2021 can be attributed to an increase in exploration activity. The decrease in the net loss for the quarter is due mainly to a decrease in consulting and professional fees and stock based compensation. As of February 28, 2021, the Company had current assets of \$402,630, compared to current assets of \$9,773 as at May 31, 2020, the increase stemming from cash received from private placement offerings and warrant exercises. As of February 28, 2021, the Company's current liabilities were \$249,188 compared to current liabilities of \$273,341 as at May 31, 2020, the decrease is due to a reduction in payables. The difficulty in raising capital has had a significant effect upon the Company's cash flow.

### Liquidity

Advance Gold does not currently own or have an interest in any producing resource properties and has not yet derived any revenues from the sale of resource products. Advance Gold's exploration activities have been funded through the issuance of common shares pursuant to private placements and the issuance of a convertible debenture, and Advance Gold expects that it will continue to be able to utilize this source of financing until it develops cash flow from its operations. There can be no assurance, however, that Advance Gold will be able to obtain required financing in the future on acceptable terms, or at all. In the near term, Advance Gold plans to attract suitable partners in order to advance its currently held properties.

	Feb 28, 2021	Feb 28, 2020
Working capital (deficiency)	\$ 153,442	\$ (66,180)
Deficit	\$ 7,099,130	\$ 6,487,973

### Financing

On July 9, 2019, the Company closed a non-brokered private placement of 4,682,000 shares at \$0.05 per unit for gross proceeds of \$234,100. Each Unit is comprised of one common share of the Company and one non-transferable share purchase warrant. Each share warrant entitles the holder to purchase an additional common share at a price of \$0.07 per share until July 9, 2021, subject to accelerated expiry in certain circumstances. No value was allocated to the attachable warrants, using the residual value method, due to the proceeds being less than market value at the time. The Company incurred share issue costs of \$750 and finder's fees of \$10,000 as well as issued 57,143 broker's warrants with a fair value of \$2,345 in connection with this financing. The fair value of the broker warrants was determined using the Black-Scholes Option Pricing Model with

the following assumptions: risk free interest rate of 1.58%; expected life of 2 years; expected volatility of 147% and dividend yield of nil.

On November 8, 2019, the Company closed a non-brokered private placement of 1,412,500 shares at \$0.08 per unit for gross proceeds of \$113,000. ### Capital Resources

Advance Gold does not have sufficient funds to meet its anticipated general and administrative expenses for the next 12 months and will therefore have to find alternative sources of funding to pay these anticipated expenses. Advance Gold may from time to time choose to raise money in the capital markets if favourable conditions are present. Additional financing will be required for further exploration programs on Advance Gold's properties during the next fiscal year should new acquisitions occur. The earn-in requirements of Acacia cover exploration requirements at the three Kakamega properties.

### Third Quarter Results

Advance Gold had a net loss of \$72,562 (2020 –\$86,084) and general and administrative expenses of \$71,427 (2020 - \$93,745) during the quarter ended February 28, 2021. Such expenses included:

	Q3 2021	Q3 2020
Advertising and promotion	\$ 16,363	\$ 623
Consulting fees	6,030	22,081
Interest, bank charges and foreign exchange loss	3,554	9,435
Management fees	22,500	15,000
Office and sundry	1,417	5,162
Professional fees	9,790	18,733
Rent and telephone	984	12,366
Stock based compensation	-	-
Transfer agent and filing fees	5,282	10,345
Wages and benefits	5,507	-
	<u>\$ 71,427</u>	<u>\$ 93,745</u>

Administrative expenses have decreased from the prior year due primarily to a decrease in all expenses except advertising and promotion, management fees and wages and benefits. Exploration activity is expected to pick up in the future. Advance Gold had working capital of \$153,442 for the quarter ended February 28, 2021.

### Related Party Transactions

Related parties are directors and officers, and companies controlled by directors and officers of Advance Gold. The following summarizes Advance Gold's related party transactions for the quarters ended February 28, 2021 and February 29, 2020:

	Quarter Ended Feb 29, 2020		Quarter Ended Feb 28, 2019	
Management Fees	\$	22,500	\$	15,000
Consulting	\$	8,730	\$	5,180
Rent	\$	-	\$	-
Salaries	\$	5,507	\$	-

These transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

### Critical Accounting Estimates

The preparation of consolidated financial statements in conformity with IFRS requires management to make estimates and assumptions about future events that affect amounts reported in the financial statements. Actual results could differ from these estimates. Significant accounting estimates used in the preparation of Advance Gold's consolidated financial statements are:

**(a) Impairment of non-financial assets**

When there are indications that an asset may be impaired, the Company is required to estimate the asset's recoverable amount. Recoverable amount is the greater of value in use and fair value less costs to sell. Determining the value in use requires the Company to estimate expected future cash flows associated with the assets and a suitable discount rate in order to calculate present value. No impairment was recognized for the three months ended February 28, 2021.

**(b) Stock-based compensation**

Management is required to make certain estimates when determining the fair value of share option awards, and the number of awards that are expected to vest. These estimates affect the amount recognized as share-based compensation in the Company's consolidated statement of comprehensive loss. For the three months ended February 28, 2021 the Company recognized share-based compensation expense of \$nil (2020 - \$nil).

**(c) Equipment**

Equipment are depreciated using the declining balance method at the rate of 30% per year. They are not depreciated until available for use. Changes in the estimated useful lives could significantly increase or decrease the amount of depreciation recorded during the year and the carrying value of equipment. Total carrying value of equipment at February 28, 2021 was \$71,935 (May 31, 2020 - \$54,570).

**(d) Exploration and evaluation assets**

Management is required to apply judgment in determining whether technical feasibility and commercial viability can be demonstrated for its mineral properties under exploration. Once technical feasibility and commercial viability of a property can be demonstrated, it is reclassified from exploration and evaluation assets and subject to different accounting treatment. As at February 28, 2021 and February 29, 2020 management had determined that no reclassification of exploration and evaluation assets was required.

**(e) Income taxes**

The measurement of income taxes payable and deferred income tax assets and liabilities requires management to make judgments in the interpretation and application of the relevant tax laws. The actual amount of income taxes only

becomes final upon filing and acceptance of the tax return by the relevant authorities, which occurs subsequent to the issuance of the consolidated financial statements.

### Financial Instruments

Advance Gold's financial instruments consist of cash, investments, accounts receivable and accounts payable. The fair value of these financial instruments is approximately equal to their carrying values, unless otherwise noted. Unless otherwise noted, it is management's opinion that Advance Gold is not exposed to significant interest, currency or credit risks arising from these financial instruments. Interest rate risk is limited as the Company only invests in highly liquid securities with short-term maturities. The Company manages its currency risk through the preparation of short and long term expenditure budgets in different currencies and converting Canadian dollars to foreign currencies whenever exchange rates are favourable. Credit risk is minimal as accounts receivable consists primarily of goods and services tax refunds due from the Government of Canada.

As at February 28, 2021 \$377,976 cash and cash equivalents are held in Canadian dollars, \$49 cash and cash equivalents are held in US dollars and Kenya Schilling, and \$17,970 cash and cash equivalents are held in Mexican Pesos. Advance Gold does not use derivative instruments or foreign exchange contracts to hedge against gains or losses arising from foreign exchange fluctuations.

### Fair Value

Fair value estimates are made at the reporting period end date, based on relevant market information. Estimated fair value amounts are designed to approximate amounts at which financial instruments could be exchanged in a current transaction between willing parties who are under no compulsion to act.

The Company uses a fair value hierarchy to categorize the inputs used in valuation techniques to measure fair value of financial instruments. The classifications are as follows: the use of quoted market prices for identical assets or liabilities (Level 1), internal models using observable market information as inputs (Level 2) and internal models without observable market information as inputs (Level 3). The Company had no Level 2 or Level 3 financial instruments at February 28, 2021 and May 31, 2020, and there have been no transfers between levels.

The following is an analysis of the Company's financial assets measured at fair value as at February 28, 2021 and May 31, 2020:

	February 28, 2021		
	Level 1	Level 2	Level 3
Cash	\$ 377,976	\$ -	\$ -

  

	May 31, 2020		
	Level 1	Level 2	Level 3
Cash	\$ 2,461	\$ -	\$ -

### Financial Risk Management

The Company's financial instruments potentially expose it to a variety of risks, including credit risk, foreign exchange risk (currency), liquidity and interest rate risk.

### Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Company to credit risk consist of cash and amounts

receivable. The Company deposits the majority of its cash with high credit quality financial institutions in Canada reducing the credit risk. Amounts receivable consist of receivable for shares subscription and refundable tax credits. Therefore, the credit risk is considered to be minimal.

#### ***Currency risk***

Currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. Certain assets and liabilities of the Company are denominated in Kenyan Shilling and Mexican Peso and are therefore subject to fluctuation against the Canadian dollar. Currency risk is considered to be moderate.

The Canadian dollar equivalent of financial instruments denominated in foreign currency as at February 28, 2021 and May 31, 2020 is as follows:

	<b>February 28, 2021</b>	<b>May 31, 2020</b>
Cash	\$ 18,019	\$ 223
Accounts payable and accrued liabilities	(117,718)	(98,143)
	<b>\$ (99,699)</b>	<b>\$ (97,920)</b>

#### ***Interest rate risk***

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in market interest rates. Current financial assets and financial liabilities are generally not exposed to interest rate risk because of their short-term nature, maturity, and fixed interest rate on debentures.

#### ***Liquidity risk***

Liquidity risk is the risk that an entity will encounter difficulty in raising funds to meet commitments associated with financial instruments. The Company manages liquidity by maintaining adequate cash balances. The Company's expected source of cash flow in the upcoming year is anticipated to be through equity financing and future loan facilities, and potential joint venture agreements. Cash on hand at February 28, 2021 is insufficient to fund the Company's operational needs for the next 12 months. Liquidity risk is assessed as high.

### Risk Factors

Exploration-stage mineral exploration companies face a variety of risks and, while unable to eliminate all of them, Advance Gold aims at managing and reducing such risks as much as possible. Few exploration projects successfully achieve development stage, due to factors that cannot be predicted or anticipated, and even one such factor may result in the economic viability of a project being detrimentally impacted such that it is neither feasible nor practical to proceed. Advance Gold closely monitors its activities and those factors that could impact them, and employs experienced consultants to assist in its risk management and to make timely adequate decisions.

Environmental laws and regulations could also impact the viability of a project. Advance Gold has ensured that it has complied with these regulations, but there can be changes in legislation outside Advance Gold's control that could also add a risk factor to a project. Operating in a specific country has legal, political and a currency risk that must be carefully considered to ensure their level is commensurate to Advance Gold's assessment of the project.

### Approval
