

Management's Discussion and Analysis For the Quarter Ended February 28, 2014

The following discussion and analysis, prepared as of April 25, 2014, should be read together with the interim consolidated financial statements of Advance Gold for the quarter ended February 28, 2014, which are prepared in accordance with International Financial Reporting Standards ("IFRS"). All amounts are stated in Canadian dollars unless otherwise indicated. The reader should also refer to the audited consolidated financial statements for the years ended May 31, 2013 and May 31, 2012 and related notes attached thereto and the related Management Discussion and Analysis for those years.

IFRS replaced the previous Canadian GAAP for publicly accountable enterprises, including the Company, effective for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. Accordingly, the accompanying consolidated financial statements have been prepared in accordance with IFRS. The transition to IFRS resulted in changes to the Company's accounting policies. The fiscal 2011 comparative information presented in the consolidated financial statements and the MD&A reflect accounting policies consistent with IFRS.

Financial information in this MD&A for periods prior to June 1, 2010 has not been restated for the changes in accounting policy. For the purposes of this MD&A, the term "Canadian GAAP" or "CGAAP" refers to Canadian generally accepted accounting principles for the Company before the adoption of IFRS.

Forward looking financing financial statements & cautionary factors that may affect future results

This MD&A may contain "forward-looking statements" which reflect the Company's current expectations regarding the future results of operations, performance and achievements. The Company has tried, wherever possible, to identify these forward-looking statements by, among other things, using words such as "anticipate," "believe," "estimate," "expect" and similar expressions. The statements reflect the current beliefs of the management of the Company, and are based on currently available information. Accordingly, these statements are subject to known and unknown risks, uncertainties and other factors, which could cause the actual results, performance, or achievements of the Company to differ materially from those expressed in, or implied by, these statements. Historical results of operations and trends that may be inferred from the following discussions and analysis may not necessarily indicate future results from operations. Additional information related to Advance Gold is available for view on SEDAR at www.sedar.com.

Description of Business

Advance Gold is an exploration stage company engaged in the evaluation and exploration of mineral property interests. Advance Gold trades on the TSX Venture Exchange under the symbol "AAX". It currently has interests in Kenya, East Africa.

Management & Directors

James T. Gillis, Director, President & Chief Executive Officer – Since 1985 Mr. Gillis has been the President of James T. Gillis Management Co. Inc., a private company which provides management services to public companies. He is the President and Chief Executive Officer of Navasota Resources Inc., President of Cassidy Gold Corp. and a director of Datum Ventures Inc. and Guyana Frontier Mining Corp.

Christopher J. Wild, P.Eng, Director – Mr. Wild is currently a director of Cassidy Gold Corp. and a director, Vice President Exploration and Chief Operating Officer of Navasota Resources Inc. Mr. Wild is a Professional Engineer with over 30 years of experience in mining and mineral exploration in North and South America and Africa. Mr. Wild earned a Bachelor of Applied Science degree from the University of British Columbia in 1984. He subsequently worked for a few major mining companies including Noranda and Minnova (Inmet Mining) before becoming Chief Mine Geologist at Goldstream Mine, north of Revelstoke and then Mount Polley Mine near Likely, British Columbia. Mr. Wild has spent the last 10 + years exploring and developing gold, bauxite, and uranium projects in

West Africa. Recently, Mr. Wild was named Chief Geologist at KGHM International's Ajax Project, near Kamloops, British Columbia.

Mr. Jeffrey Scott Ackert, Director and Vice-President, Exploration and Business Development – Mr. Ackert, a geologist, has been involved in gold exploration in Africa for over 10 years. Mr. Ackert has worked in Burkina Faso, Mali, Niger and Ghana in West Africa, and Tanzania and Kenya in East Africa. He has worked for several majors, including six years as a mine geologist at Barrick's Golden Patricia mine in Northern Ontario. Mr. Ackert held the positions of Vice-President of Exploration and Vice-President Technical Services for Orezone Resources Inc. until that company's sale to IAMGOLD.

Marie Cupello, Corporate Secretary & Chief Financial Officer - Ms. Cupello has approximately 18 years of experience as a bookkeeper for a wide variety of companies including junior exploration companies, a management company, a non-profit society, among others. For the past eight years she has been head of the accounting department for a number of private companies and several publicly listed companies including Advance Gold Corp., Cassidy Gold Corp., and Navasota Resources Inc.

Ali Afif Fawaz, Director - Mr. Fawaz is an international transportation supply chain professional and a licensed customs broker. Since 2000, Mr. Fawaz has been the managing director of Villa Plast Ltd., a scrap-metal recycling plant in Dar es Salaam, Tanzania, and since 2001 he has been the managing director of BNM Company Ltd., a company providing clearing and freight forwarding liaison services to associated entities in the Democratic Republic of Congo. Mr. Fawaz also consults and provides services to a number of entities involved in freight forwarding, and the container freight and cargo transport industries operating out of Dar es Salaam, Tanzania, as well as being involved, since 2010, as a consultant to the mining industry in Tanzania. Mr. Fawaz is fluent in English, French, Arabic and Kiswahili.

Oswaldo Iadarola, Director - Mr. Iadarola is President and CEO of Audiotech Healthcare Corporation, a private company, and a director of Cassidy Gold Corp., a public company trading on the TSX Venture Exchange. He is also President of Excalibur Properties, a private real estate development company.

Performance Summary

Kakamega Properties

Rosterman, Bukura and Sigalagala Gold Properties, Kenya East Africa

On November 1, 2012 Advance announced that **African Barrick Gold Plc.** ("ABG") was assigned an Option and Joint Venture Agreement that Advance had previously entered into with Aviva Corporation Ltd. regarding Special License 265 (Bukura), Special License 266 (Sigalagala) and Special License 267 (Rosterman) located in the Kakamega region of Kenya.

ABG has the right to acquire a 51% ownership interest in the three Advance Special Licenses in consideration for ABG incurring exploration expenditure of US\$0.5 million in a defined period of 24 months in relation to those mineral rights. ABG can further increase its interest to 75 % by spending an additional US\$ 1million within a further 24 month period.

On February 28, 2013 Advance announced that ABG would proceed with an exploration program on Advance's three projects in the Kakamega Dome area in Kenya, East Africa. The work done on the Advance projects would be in conjunction with ABG's regional exploration work on their West Kenya Joint Venture. The three Advance projects include Special License 265 (Bukura), Special License 266 (Sigalagala) and Special License 267 (Rosterman) that cover in total 64km².

On July 25, 2013 Advance announced that ABG had completed a deep diamond drill hole to a depth of 506m. All Rosterman quartz reefs targeted were intersected; however, limited disseminated sulphides were intersected in zones between quartz reefs. The Rosterman "reefs" were marked by remnant quartz veins, voids and/or broken ground (possibly backfill) in the core. The deepest reef intersected was the Number 4 Footwall Reef, and in the area of the core hole it was completely preserved in the core. Several other narrow quartz reefs were intersected by the core hole between the known mined reefs.

On January 28, 2014 Advance announced that ABG had completed the drilling of 325 Aircore holes for 12,494 metres with results received for 192 holes. Over 20% of the holes assayed to date have returned significant intercepts of greater than 0.1 grams per tonne gold (g/t Au).

Initial results from 192 reconnaissance Aircore drill holes testing existing gold-in-soil anomalies have been returned with some initial positive results including:

Hole ID	Elevation metres	Azi °	Dip °	Length metres	From metres	To metres	Interval metres	Au g/tonne

Qualified Person

Jeffrey Scott Ackert, a director of the Company and its Vice President Exploration and Business Development, is a Qualified Person as defined by National Instrument 43-101 and has reviewed and approved the exploration information and technical disclosure in this MD&A.

Results and Discussion of Operations

Advance's focus continues to be the exploration of properties and consequently, no operating income is shown or expected. The Company incurred a net loss of \$113,659 for the nine months ended February 28, 2014, compared to a net loss of \$274,427 for the nine months ended February 28, 2013. The current period loss is less due to lower wages and benefits, stock based compensation expense and to recognizing impairment of mineral property interests for the year ended May 31, 2013.

Summary of Quarterly Results

	Feb 28/14 IFRS	Nov 30/13 IFRS	Aug 31/13 IFRS	May 31/13 IFRS	Feb 28/13 IFRS	Nov 30/12 IFRS	Aug 31/12 IFRS	May 31/12 IFRS
Total assets	\$ 414,117	\$ 411,452	\$ 443,264	\$ 417,732	\$ 500,853	\$ 500,608	\$ 586,493	\$ 728,550
Exploration properties & deferred costs	\$ 404,081	\$ 404,057	\$ 404,015	\$ 403,946	\$ 478,868	\$ 449,417	\$ 438,813	\$ 505,208
Working capital (deficiency)	\$ (79,095)	\$ (47,114)	\$ 36,441	\$ (15,591)	\$ 4,675	\$ 16,024	\$ 95,612	\$ 140,457
Deficit	\$ 5,435,106	\$ 5,401,691	\$ 5,355,205	\$ 5,321,447	\$ 5,171,026	\$ 5,133,566	\$ 5,056,531	\$ 4,896,599
Revenues	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -
Net loss	\$ 33,417	\$ 46,486	\$ 33,758	\$ 150,421	\$ 41,602	\$ 77,035	\$ 159,932	\$ 185,309
Earnings (loss) per share	\$ (0.01)	\$ (0.01)	\$ (0.01)	\$ (0.01)	\$ (0.01)	\$ (0.01)	\$ (0.01)	\$ (0.01)

The significant changes in key financial data from March 1, 2012 to February 28, 2014 can be attributed to write down of mineral properties and to a decrease in exploration activity due to changes in the capital market making it more difficult to raise exploration funding through private placements. The decrease in the net loss for the quarter is due to a decrease in investor relationship, property investigations, wages and stock based compensation. All other expenses are reduced due to a reduction in exploration activity. The reduction in exploration activity is due to the inability of

the Company to raise exploration funds in today's capital market. As of February 28, 2014, the Company had current assets of \$9,977, compared to current assets of \$13,715 as at May 31, 2013, the decrease stemming from the inability to raise funding through private placements. As of February 28, 2014, the Company's current liabilities were \$89,072 compared to current liabilities of \$29,306 as at May 31, 2013 (May 31, 2012- \$82,796), the increase is due to the Company not having sufficient funds to pay its expenses as they are incurred. The inability to raise capital has had a significant effect upon the Company's cash flow.

Liquidity

Advance Gold does not currently own or have an interest in any producing resource properties and has not yet derived any revenues from the sale of resource products. Advance Gold's exploration activities have been funded through the issuance of common shares pursuant to private placements and the exercise of stock options and warrants, and Advance Gold expects that it will continue to be able to utilize this source of financing until it develops cash flow from its operations. There can be no assurance, however, that Advance Gold will be able to obtain required financing in the future on acceptable terms, or at all. In the near term, Advance Gold plans to attract suitable partners in order to advance its currently held properties.

	Feb 28, 2014		Feb 28, 2013	
Working capital (deficiency)	\$	(79,095)	\$	4,675
Deficit	\$	5,435,106	\$	5,171,026

Financing

On January 4, 2013 Advance Gold announced that it was conducting a non-brokered private placement of up to 2,000,000 units ("Units") of the Company at a price per Unit of \$0.05 for aggregate proceeds of up to \$100,000. Each Unit consisted of one common share in the capital of the Company and one non-transferable share purchase warrant, each warrant entitling the holder to purchase one additional common share at a price of \$0.10 for one year from the closing of the offering, subject to accelerated expiry in certain circumstances. The proceeds of the private placement were used by the Company for general corporate purposes. On January 25, 2013 the first tranche, consisting of 1,000,000 units, closed. A director and officer of the Company participated in the private placement, having purchased 200,000 units.

On March 14, 2013 Advance Gold announced that it was conducting a non-brokered private placement of up to 1,000,000 units ("Units") of the Company at a price per Unit of \$0.05 for aggregate proceeds of up to \$50,000. Each Unit consisted of one common share in the capital of the Company and one non-transferable share purchase warrant, each whole warrant entitling the holder to purchase one additional common share at a price of \$0.10 for one year from the closing of the offering, subject to accelerated expiry in certain circumstances. The proceeds of the private placement were used by the Company for general corporate purposes. On April 16, 2013 Advance announced that it had closed the private placement which consisted of 875,000 units for gross proceeds of \$43,750. A director and officer of the Company participated in the private placement, having purchased 400,000 units.

On August 14, 2013 Advance Gold announced that it was conducting a non-brokered private placement of up to 1,000,000 units ("Units") of the Company at a price per Unit of \$0.05 for aggregate proceeds of up to \$50,000. Each Unit consisted of one common share in the capital of the Company and one non-transferable share purchase warrant, each whole warrant entitling the holder to purchase one additional common share at a price of \$0.10 for two years from the closing of the offering, subject to accelerated expiry in certain circumstances. The proceeds of the private placement were used by the Company for general corporate purposes. On September 10, 2013 Advance announced that it had closed the private placement which consisted of 600,000 units for gross proceeds of \$30,000. A director and officer of the Company participated in the private placement, having purchased 300,000 units.

On February 27, 2014 Advance Gold announced that it proposed a \$50,000 debenture financing with two lenders. The loan bears interest at 10% per annum and is intended to be paid on its maturity, being March 6, 2015. At its sole discretion, the Company can repay the loan (principal and interest) in whole or in part prior to maturity without notice, bonus or penalty. An additional term of the loan requires the Company to issue 200,000 of its common shares at a fair value of \$0.05 per share as a bonus for the loan, which shares were issued in March, 2014.

Capital Resources

Advance Gold does not have sufficient funds to meet its anticipated general and administrative expenses for the next 12 months and will therefore have to find alternative sources of funding to pay these anticipated expenses. Advance Gold may from time to time choose to raise money in the capital markets if favourable conditions are present. Additional financing will be required for further exploration programs on Advance Gold's properties during the next fiscal year should new acquisitions occur. The earn-in requirements of African Barrick cover exploration requirements at the three Kakamega properties.

Third Quarter Results

Advance Gold had a net loss of \$33,417 (2013 - \$41,602) and general and administrative expenses of \$33,417 (2013 - \$41,602) during the quarter ended February 28, 2014. Such expenses included:

	Q3 2014	Q3 2013
Advertising and promotion	\$ 215	\$ 2,405
Amortization of equipment	4	4
Consulting fees	-	3,000
Impairment of mineral property	-	(6,832)
Interest, bank charges and foreign exchange loss	187	417
Management fees	15,000	15,000
Office and sundry	77	282
Professional fees	11,998	9,942
Property Investigation	-	-
Rent and telephone	96	934
Stock based compensation	2,806	8,154
Transfer agent and filing fees	3,034	4,474
Wages and benefits	-	3,822
	<u>\$ 33,417</u>	<u>\$ 41,602</u>

Administrative expenses have decreased from the prior year due mainly to a decrease in wages and benefits, office expenses and impairment of mineral property. All other administration expenses have decreased from the prior year due to a decrease in exploration activity which is expected to pickup in the future. Advance Gold had a working capital deficiency of \$79,095 for the quarter ended February 28, 2014.

Related Party Transactions

Related parties are directors and officers, and companies controlled by directors and officers of Advance Gold. The following summarizes Advance Gold's related party transactions for the quarters ended February 28, 2014 and February 28, 2013:

	Quarter Ended Feb 28, 2014	Quarter Ended Feb 28, 2013
Management Fees	\$ 15,000	\$ 15,000
Rent	\$ -	\$ 592
Salaries	\$ -	\$ 3,000

These transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties. Management fees were paid to a company controlled by a director of Advance Gold. Rent was paid to a company with common management.

Critical Accounting Estimates

The preparation of consolidated financial statements in conformity with IFRS requires management to make estimates and assumptions about future events that affect amounts reported in the financial statements. Actual results could differ from these estimates. Significant accounting estimates used in the preparation of Advance Gold's consolidated financial statements are:

(a) Impairment of non-financial assets

When there are indications that an asset may be impaired, the Company is required to estimate the asset's recoverable amount. Recoverable amount is the greater of value in use and fair value less costs to sell. Determining the value in use requires the Company to estimate expected future cash flows associated with the assets and a suitable discount rate in order to calculate present value. During the year ended May 31, 2013, the Company recognized an impairment of \$168,459 representing the carrying values of the Ngira Migori and Nyakagwe Properties.

(b) Useful life of property, plant and equipment

Property, plant and equipment are depreciated over the estimated useful lives of the assets. Changes in the estimated useful lives could significantly increase or decrease the amount of depreciation recorded during the year and the carrying value of property, plant and equipment. Total carrying value of property, plant and equipment at February 28, 2014 was \$59 (February 28, 2013 - \$77).

(c) Stock-based compensation

Management is required to make certain estimates when determining the fair value of share option awards, and the number of awards that are expected to vest. These estimates affect the amount recognized as share-based compensation in the Company's consolidated statement of comprehensive loss. For the quarter ended February 28, 2014 the Company recognized share-based compensation expense of \$2,806 (February 28, 2013 - \$8,154).

(d) Exploration and evaluation assets

Management is required to apply judgment in determining whether technical feasibility and commercial viability can be demonstrated for its mineral properties under exploration. Once technical feasibility and commercial viability of a property can be demonstrated, it is reclassified from exploration and evaluation assets and subject to different accounting treatment. As at May 31, 2013 and 2012 management had determined that no reclassification of exploration and evaluation assets was required.

(e) Income taxes

The measurement of income taxes payable and deferred income tax assets and liabilities requires management to make judgments in the interpretation and application of the relevant tax laws. The actual amount of income taxes only becomes final upon filing and acceptance of the tax return by the relevant authorities, which occurs subsequent to the issuance of the consolidated financial statements.

Accounting Standards Issued But Not Yet Effective

The following new or amended accounting standards have been issued by the International Accounting Standards Board ("IASB") for periods beginning on or after January 1, 2013. These new or amended standards are not yet effective, and the Company has not completed its assessment of their impact on its consolidated financial statements.

IFRS 9 Financial Instruments

In November 2009, the IASB issued, and subsequently revised in October 2010, IFRS 9 Financial Instruments (IFRS 9) as a first phase in its ongoing project to replace IAS 39. IFRS 9, which is to be applied retrospectively, is effective for annual periods beginning on or after January 1, 2015, with earlier application permitted.

IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. The standard also adds guidance on the classification and measurement of financial liabilities.

IFRS 10 Consolidated Financial Statements

In May 2011, the IASB issued IFRS 10 Consolidated Financial Statements (IFRS 10). IFRS 10, which is to be applied retrospectively, is effective for annual periods beginning on or after January 1, 2013, with earlier application permitted.

IFRS 10 requires an entity to consolidate an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Under existing IAS 27 *Consolidated and Separate Financial Statements* ("IAS 27"), consolidation is required when an entity has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. IFRS 10 will replace SIC 12 *Consolidation - Special Purpose Entities* and parts of IAS 27.

IFRS 11 Joint Arrangements

IFRS 11 was issued in May 2011, and is effective for annual periods beginning on or after January 1, 2013 with earlier application permitted.

IFRS 11 requires interests in joint arrangements to be classified as a joint venture or joint operation. A joint arrangement is an arrangement in which two or more parties have joint control. Joint ventures will be accounted for using the equity method of accounting whereas a party with joint control of a joint operation will recognize its share of the assets, liabilities, revenues and expenses of the joint operation. Under existing IFRS, entities have the choice to proportionately consolidate or equity account for interests in certain joint ventures. IFRS 11 will replace IAS 31 *Interests in Joint Ventures* and SIC 13 *Jointly Controlled Entities - Non-monetary Contributions by Venturers*.

In conjunction with the issue of IAS 11, IAS 28 *Investments in Associates* was amended to include joint ventures within its scope, and to address the guidance included in IFRS 10 and IFRS 12 *Disclosure of Interest in Other Entities*. IAS 28 is retitled to *Investments in Associates and Joint Ventures*.

IFRS 12 Disclosure of Interests in Other Entities

In May 2011, the IASB issued IFRS 12 *Disclosure of Interests in Other Entities* (IFRS 12). IFRS 12, which is to be applied retrospectively, is effective for annual periods beginning on or after January 1, 2013, with earlier application permitted.

IFRS 12 establishes disclosure requirements for interests in other entities, such as subsidiaries, joint arrangements, associates and unconsolidated structured entities. The IFRS standard carries forward existing disclosures and also introduces significant additional disclosure requirements that address the nature of, and risks associated with, an entity's interests in other entities. The standard also requires enhanced disclosures of how control was determined and any restrictions that might exist on consolidated assets and liabilities within the consolidated financial statements.

IFRS 13 Fair Value Measurement

In May 2011, the IASB issued IFRS 13 *Fair Value Measurement* (IFRS 13). IFRS 13, which is to be applied prospectively, is effective for annual periods beginning on or after January 1, 2013, with earlier application permitted.

Off-Balance Sheet Arrangement

Advance Gold does not have any off-balance sheet arrangements which may affect its current or future operations or conditions.

Financial Instruments

The Company's financial instruments are exposed to certain financial risks, being credit risk, liquidity risk, and market risk, which are defined as follows:

(a) Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Company to credit risk consist of cash and cash equivalents. The Company deposits the majority of its cash and cash equivalents with high credit quality financial institutions in Canada and as a result, the Company considers its credit risk to be minimal.

(b) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in raising funds to meet commitments associated with financial instruments. The Company manages liquidity risk by maintaining adequate cash and short-term investment balances.

The Company's expected source of cash flow in the upcoming year will be through equity financing and future loan facilities. Cash on hand at February 28, 2014 and expected cash flows for the next 12 months are not sufficient to fund the Company's ongoing operational needs. Therefore, the Company will need funding through equity or debt financing, entering into joint venture agreements, or a combination thereof.

Accounts payable and accrued liabilities are due within twelve months of the consolidated statement of financial position date.

(c) Market risk

Market risk consists of interest rate risk, foreign currency risk and other price risk. These are discussed further below.

(i) Interest rate risk

Interest rate risk consists of two components:

- To the extent that payments made or received on the Company's monetary assets and liabilities are affected by changes in the prevailing market interest rates, the Company is exposed to interest rate cash flow risk.
- To the extent that changes in prevailing market rates differ from the interest rate in the Company's monetary assets and liabilities, the Company is exposed to interest rate price risk.

Current financial assets and financial liabilities are generally not exposed to interest rate risk because of their short-term nature and maturity.

(ii) Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rates. The Company is exposed to foreign currency risk to the extent that monetary assets and liabilities are denominated in foreign currency.

The Company is exposed to foreign currency risk with respect to cash and cash equivalents and accounts payable and accrued liabilities, as a portion of these amounts are denominated in US dollars as follows:

	Feb 28, 2014	Feb 28, 2013
Cash and cash equivalents	\$ 1,886	\$ 2,629
Accounts payable and accrued liabilities	318	-
Rate to convert to \$1.00 CDN	\$ 1.1074	\$ 1.0314

The Company manages foreign currency risk by minimizing the value of financial instruments denominated in foreign currency. The Company has not entered into any foreign currency contracts to mitigate this risk.

(iii) Other price risk

The Company's ability to raise capital to fund mineral resource exploration is subject to risks associated with fluctuations in mineral resource prices. Management closely monitors commodity prices, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

(d) Fair value of financial instruments

The fair values of the Company's amounts receivable, accounts payable and accrued liabilities and loan payable approximate their carrying values because of the short-term nature of these instruments.

The Company uses a fair value hierarchy that categorizes inputs used in valuation techniques to measure the fair value of financial instruments:

- Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company's cash and cash equivalents are all classified at level one of the fair value hierarchy. The Company's remaining financial instruments are classified as Level 2.

Changes in Accounting Policies

Advance Gold has not changed its accounting policies for the three months ended February 28, 2014.

Off-Balance Sheet Arrangements

Advance Gold does not have any off-balance sheet arrangements which may affect its current or future operations or conditions.

Financial Instruments

Advance Gold's financial instruments consist of cash, investments, accounts receivable and accounts payable. The fair value of these financial instruments is approximately equal to their carrying values, unless otherwise noted. Unless otherwise noted, it is management's opinion that Advance Gold is not exposed to significant interest, currency or credit risks arising from these financial instruments. Interest rate risk is limited as the Company only invests in highly liquid securities with short-term maturities. The Company manages its currency risk through the preparation of short and long term expenditure budgets in different currencies and converting Canadian dollars to foreign currencies whenever exchange rates are favourable. Credit risk is minimal as accounts receivable consists primarily of goods and services tax refunds due from the Government of Canada.

As at February 28, 2014 \$3,324 cash and cash equivalents are held in Canadian dollars, \$1,886 cash and cash equivalents are held in US dollars and Kenya Schilling. Advance Gold does not use derivative instruments or foreign exchange contracts to hedge against gains or losses arising from foreign exchange fluctuations.

Outstanding Share Data

The authorized capital of Advance Gold consists of an unlimited number of common shares and an unlimited number of preferred shares, issuable in series with special rights and restrictions attached. As of April 25, 2014 there were 38,481,696 common shares issued and outstanding, of which 3,125,000 stock options were outstanding, and the following warrants and broker's options were outstanding:

Grant Expiry Date	Grant Price	Warrants Outstanding
May 25, 2014	\$ 0.10	1,500,000
Jun 13, 2014	\$ 0.10	500,000
Sep 15, 2015	\$ 0.10	600,000
		2,600,000

Subsequent Events

Subsequent to February 28, 2014, the Company announced that it closed a \$50,000 debenture financing with two existing shareholders of the Company. The loan bears interest at 10% per annum and is intended to be paid on its maturity, being March 10, 2015. At its sole discretion, the Company can repay the loan (principal and interest) in whole or in part prior to maturity without notice, bonus or penalty. An additional term of the loan requires the Company to issue 200,000 of its common shares at a fair value of \$0.05 per share as a bonus for the loan, which were issued in March 2014.

Disclosure of Controls and Internal Controls over Financial Reporting

On November 23, 2007, the British Columbia Securities Commission exempted TSX Exchange Venture issuers, such as the Company, from certifying disclosure controls and procedures as well as internal controls over financial reporting as of December 31, 2007, and thereafter. Upon adopting those requirement changes, the Company currently files basic certificates, which do not include assessments relating to establishment and maintenance of disclosure controls and procedures as defined under National Instrument 52-109.

Investor Relations

Investor relations activities are currently being performed by directors, officers and key personnel.

Risk Factors

Exploration-stage mineral exploration companies face a variety of risks and, while unable to eliminate all of them, Advance Gold aims at managing and reducing such risks as much as possible. Few exploration projects successfully achieve development stage, due to factors that cannot be predicted or anticipated, and even one such factor may result in the economic viability of a project being detrimentally impacted such that it is neither feasible nor practical to proceed. Advance Gold closely monitors its activities and those factors that could impact them, and employs experienced consultants to assist in its risk management and to make timely adequate decisions.

Environmental laws and regulations could also impact the viability of a project. Advance Gold has ensured that it has complied with these regulations, but there can be changes in legislation outside Advance Gold's control that could also add a risk factor to a project. Operating in a specific country has legal, political and a currency risk that must be carefully considered to ensure their level is commensurate to Advance Gold's assessment of the project.

Approval

The Board of Directors of the Company has approved the disclosure contained in this MD&A.
